Education

Priyadarshini College of Engineering, Nagpur

2020 - 2024

B.Tech in Computer Technology

8.45/10 CGPA

Work Experience

Excellence Technologies

July 2024 – Present

Full-Stack Developer

- I had the opportunity to work as a Full Stack Developer, where I contributed to a variety of high-impact projects that enhanced my technical expertise and broadened my understanding of the software development lifecycle.
- Maintained stringent code quality standards by conducting comprehensive code reviews, offering insightful feedback, and implementing improvements to optimize performance and maintainability.
- Collaborated closely with team to ensure seamless translation of design concepts into functional user interfaces, actively contributing suggestions for enhancements and refinements.

Align InfoTech

Feb 2022 – March 2022

Full-Stack Intern

Remote

- Designed and developed web applications using JavaScript and React, while building and maintaining server-side APIs with Node.js and Express.
- Worked with cross-functional teams to deliver high-quality products, ensuring applications are responsive and optimized for performance.

Technical Skills

Programming Languages: JavaScript, TypeScript

Frameworks & Libraries: NextJs, ReactJs, NodeJs, ExpressJs, TailwindCSS, Redux, Zustand

Gen AI: Langchain, HuggingFace, RAG

Databases: MongoDB, MySQL, PostgreSQL, Redis, VectorDB

DevOps & Cloud: AWS, Docker

Projects

GHSRK - AI Agent Search Engine

[Live Link](#) 🔗

- Your AI-powered search, **workflow**, and agent engine. Build personal or **enterprise agents**. Private, **productive**, powerful. Discover the future of AI-native discovery
- Built a **multimodal AI** platform featuring **voice**, code, visual, and **document inputs**, integrated **smart agents** (Slack, Notion, Google Drive), personalized geo-aware responses, a **Fusion Engine** combining top LLMs, and enterprise-ready features like APIs, white-label copilots, and **contextual team memory**.
- **Tech stack used:** *Deno Js — ReactJs — Supabase — Edge Functions — Tailwind CSS — Shadcn UI*

QuickPostAI

[Live Link](#) 🔗

- Developed **QuickPost AI**, a platform that **converts blog content into 280-character X posts** using LLM-powered AI.
- Integrated **Engage Lab**, a toolkit offering features like contextual tweet replies that mimic **real human interaction**.
- Enables users to craft **compelling tweets** with tone customization and **schedule** them automatically for consistent posting.
- **Tech stack used:** *NodeJs — Typescript — Javascript — React — Tanstack Query — Langchain — PostgreSQL — Prisma — Zustand — Tailwind CSS*

DevMusic

[Source Code](#) 🔗 — [Live Link](#) 🔗

- Created a special music website for developers that combines music and coding in a fun way. The platform includes **real-time chat**, live user **activity tracking**, and a **unique LiveCoding Workspace** where users can create coding spaces, share ideas, and sing together.
- It also has features like personalized profiles, **total singing time tracking**, and a **leaderboard** to encourage friendly competition.
- **Tech stack used:** *TypeScript — JavaScript — NextJs — NodeJs — ExpressJs — MongoDB — Tailwind CSS — Socket.io — Zustand — Docker*
